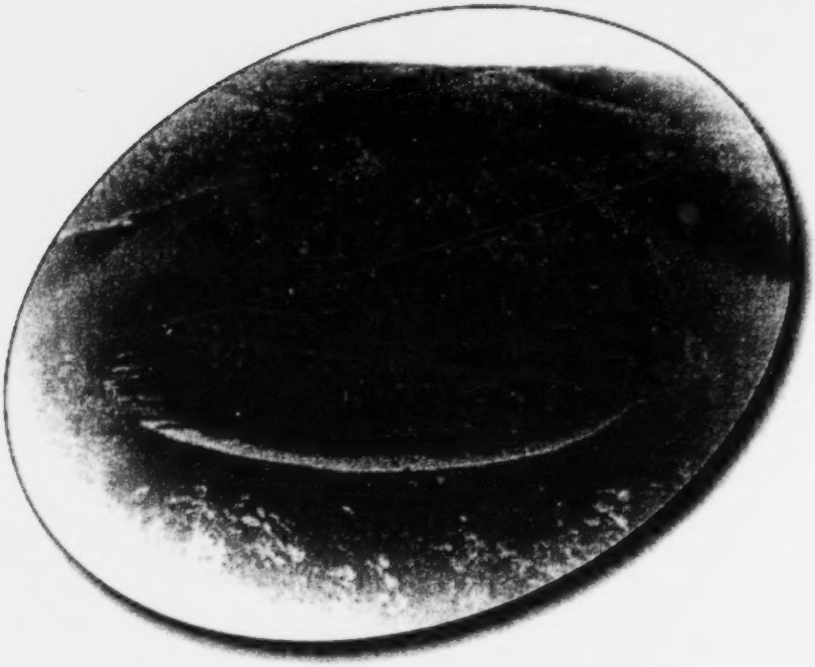
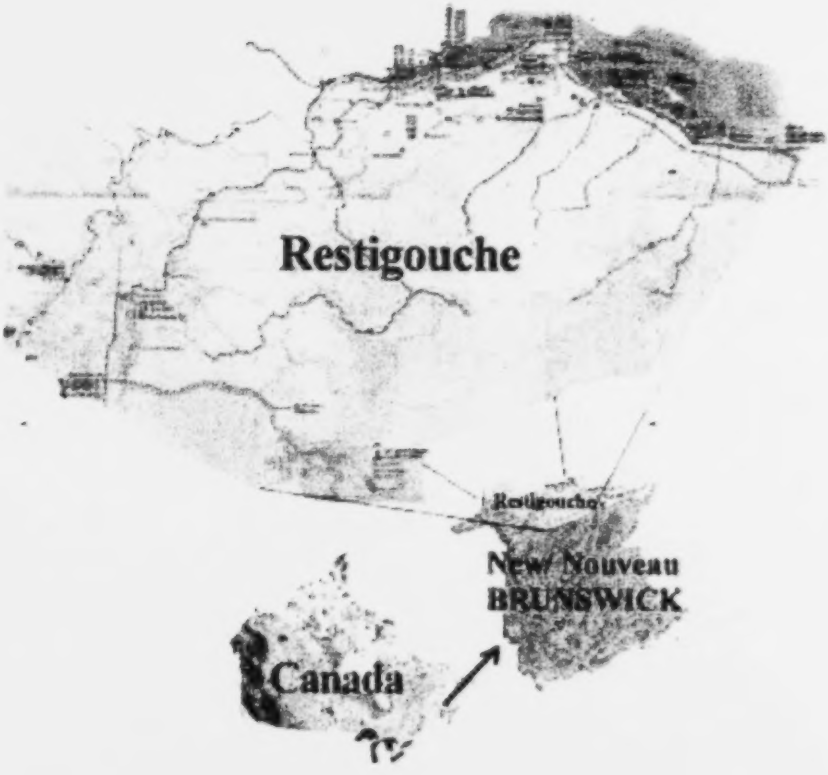
Annual Report – 2005 - Rapport Annuel

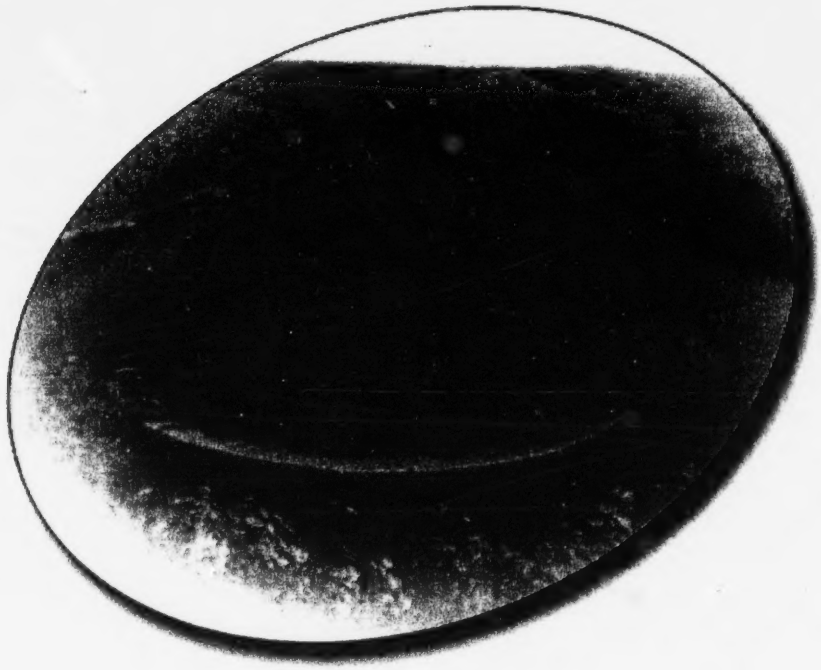
"NO TIME TO WASTE"
"AUCUN TEMPS À PERDRE"

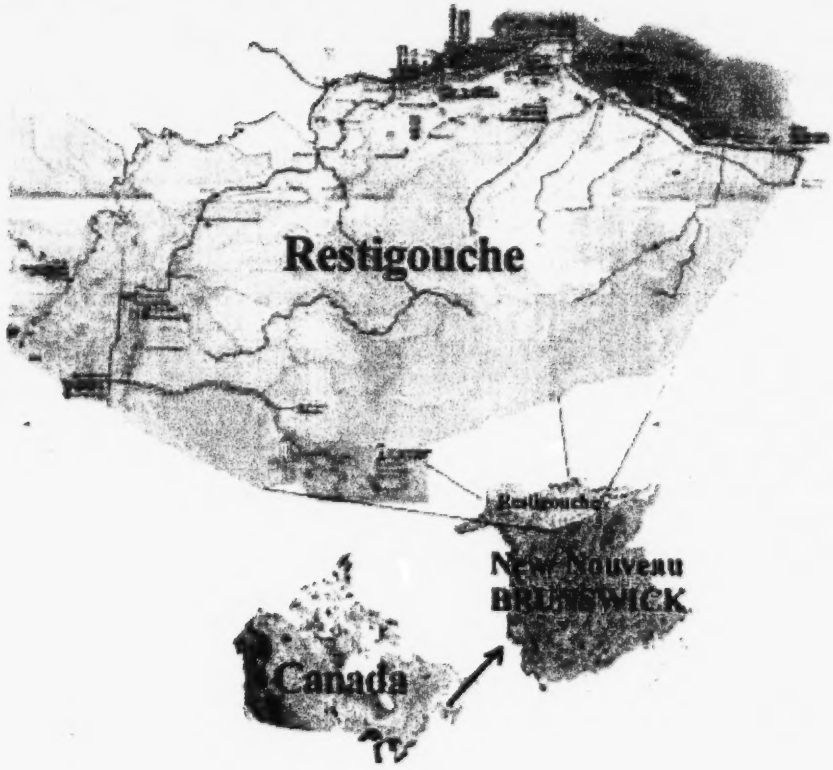
Corporation des Déchets Solides du Restigouche





Restigouche
Restigouche
New Nouveau
BRUNSWICK
Canada



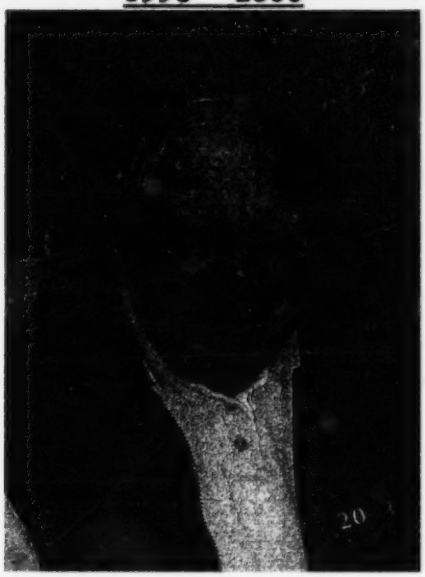


Restigouche
Canada

The 2005 annual report demonstrates the very high level of activity sustained by the Restigouche Solid Waste Corporation during the 2005 fiscal year. Together, Members and staff rose to a series of challenges, lending support across branches where necessary.

In early 2006, however, the Corporation suffered a severe loss. George Jr. Williams, a long-time member (1996-2006), passed away.

George Williams (Jr)
1996 - 2006



George was loved and respected by us all. Many Members had known George since he joined the Corporation in 1996 as the Town of Dalhousie's representative. Over the years, he held a number of senior positions, most recently as Vice-President.

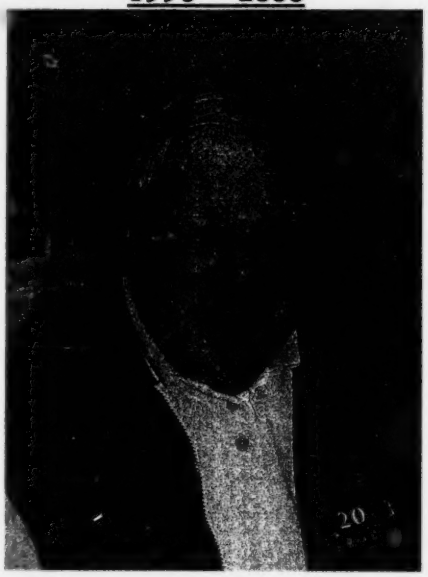
Beyond his accomplishments, George will be remembered by staff and members for his extraordinary character and charm. He was a professional and a gentleman. His integrity and honesty made him an outstanding representative. His presence among us will be sorely missed.

It is with sincere thanks that we will respectfully dedicate the 2005 RSWC Annual Report to the memory of George Williams for his commitment and contribution to RSWC between 1996 - 2006.

Le rapport annuel 2005 manifeste de très haut le niveau d'activité supportée par la Corporation des Déchets Solides du Restigouche pendant l'année 2005. Ensemble, les Membres et le personnel se sont levés à une série de défis.

Au début de 2006, cependant, la Corporation a subi une lourde perte. George "Jr" Williams, un membre de longue date (1996-2006), est décédé.

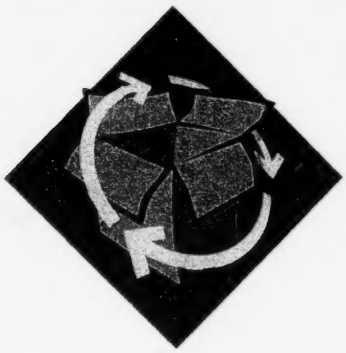
George Williams (Jr)
1996 - 2006



George fut aimé et respecté par nous tous. Beaucoup de Membres avaient connu George depuis qu'il s'était joint à la Corporation en 1996 comme représentant de la Ville de Dalhousie. Au cours des années, il a tenu un certain nombre de positions clés, le plus récent étant Vice-président.

Au-delà de ses accomplissements, le personnel et des membres se rappèleront de George pour son caractère extraordinaire et pour son charme. Il était un professionnel et un "gentleman". Son intégrité et honnêteté l'ont fait de lui un représentant remarquable. Sa présence parmi nous sera douloureusement manquée.

En témoignage de notre sincère gratitude, nous dédions respectueusement le Rapport Annuel 2005 à la mémoire de George Williams, et à sa famille.

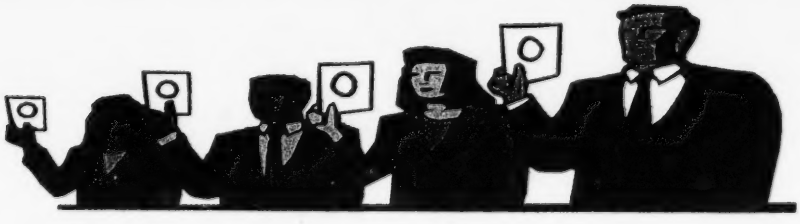


We have made it the Corporation's goal each year to provide our membership with the best and most responsive solid waste services possible, and we take pride in our work.

We are excited about RSWC's future. The Corporation is prepared to meet the challenges that lie ahead.

We plan to remain strong and be prepared to meet the challenges of the next several years. We are dedicated and committed to serve the ever-changing needs of our small, but "wonderful" region.

Where are we now? Where do we go from here? Two questions that are vital to successfully managing Restigouche's solid waste?



Ce fut le but de la Corporation depuis le tout début de fournir à nos citoyens le meilleur service de gestion des déchets solides et nous sommes fier de notre travail.

Nous sommes confiants de l'avenir de la CDSR. La Corporation est prête à faire face aux défis du futur.

Nous planifions de demeurer forts et sommes prêts à faire face aux défis des année à venir. Nous sommes dévoués et engagés de servir les besoins de notre petite, mais "merveilleuse" région.

Où sommes nous maintenant ? Où allons-nous? Deux questions qui sont essentiels à gérer avec succès les déchets solides du Restigouche.

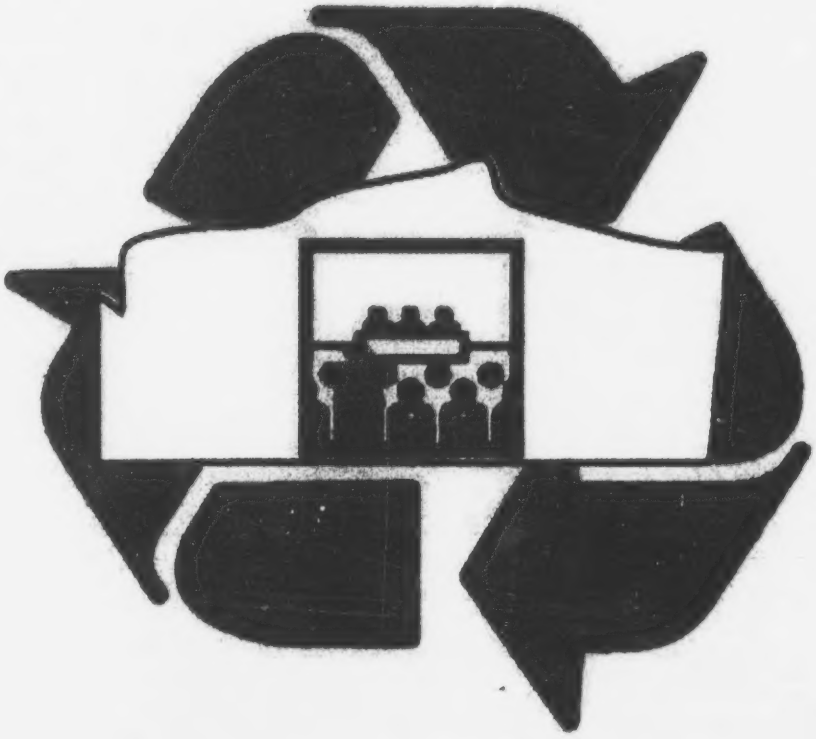
Introduction



Section 1
Introduction

The Restigouche Solid Waste Corporation provides policy direction and guidance to ensure the efficient and effective management of the region's solid waste management requirements now and in the years to come.

La Corporation des Déchets Solides du Restigouche fournit des politiques, directions et conseils pour assurer une gestion efficace des déchêts solides pour la région maintenant et pour les années à venir.

Our Strength Really is our Communities

The title of the 2004 Annual Report was: **Our Communities, Our Strengths**. It was appropriate because the many successes Restigouche Region achieved in 2004 were made possible through the strength of our member municipalities / lsd's. It is through their leadership and willingness to work together that we have formed efficient and productive service delivery partnerships. More than anything, 2004 was an outstanding year.

Notre Force est Vraiment nos Communautés

Le titre du Rapport annuel de 2004 fut: **Nos Communautés, Nos Forces**. Il fut approprié parce que les nombreux succès de la région du Restigouche réalisés en 2004 ont été rendus possibles par la force de nos municipalités / dsl's. C'est par leur leadership et empressement de travailler ensemble que nous avons formé une livraison de service efficace et productive. Quoi que ce soit, 2004 fut une année spectaculaire.

In 2005 – the title of the Annual Report will be "No time to Waste" since we are really wasting no time when it comes to recycling in the Restigouche region. More than anything – 2005 was another outstanding year.

En 2005 – le titre du Rapport Annuel sera "Aucun temps à perdre" parce que les gens ne perdent pas de temps à embarquer dans le recyclage. Quoi que ce soit – 2005 a été une autre année spectaculaire.

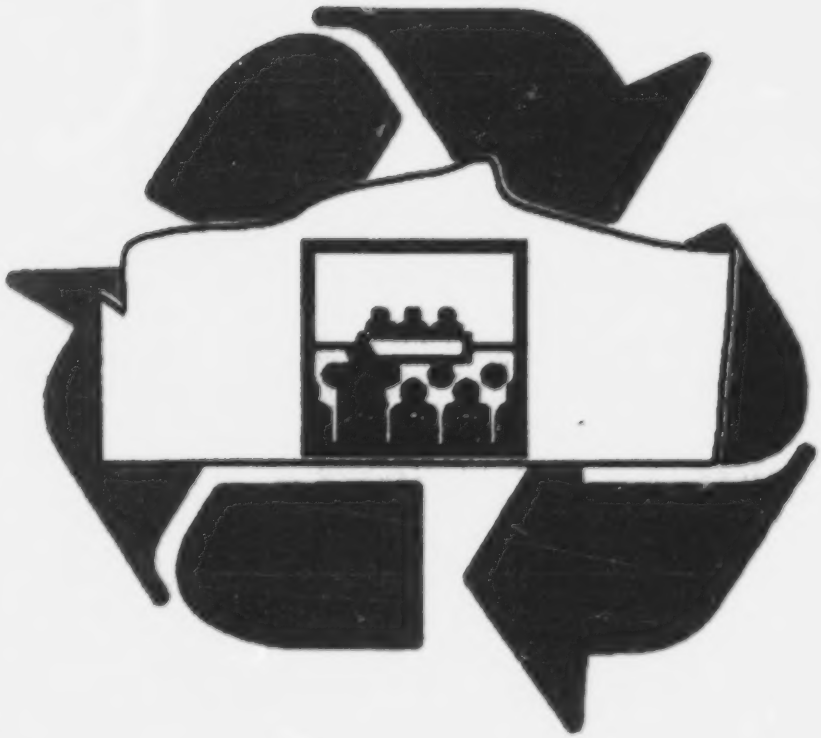
Chairman's Message
du Président



Section 2
Chairman's Message du Président

In our 2003 Annual Report, the previous Chairman, Boyd Poley, mentioned that the years to come would be big years for Restigouche, years of milestones and challenges, of tough choices and decisions. 2004 was all of those things, a year in which our region moved forward. Significant results have been achieved on a number of fronts.

Dans le rapport annuel de 2003, l'ancien président, Boyd Poley, avait mentionné que 2004 serait une année chargée pour le Restigouche, une année d'événements marquants et de défis, de choix et de décisions difficiles. L'année 2004 s'est avérée être tout cela, une année au cours de laquelle la région a connu des progrès. Des résultats importants ont été enregistrés sur plusieurs fronts.

The success we enjoyed in 2005, while supported by clear policy, was a direct result of the hard work and commitment of all our residents. It is by working together, government, business and workers, that we can achieve our full potential as a region.

Les succès que nous avons connus en 2005, bien que soutenus par des politiques publiques claires, sont directement attribuables au travail ardu, à l'esprit entrepreneurial et à l'engagement des gens du Restigouche. C'est en travaillant ensemble, le gouvernement, les entreprises et les travailleurs, que nous pouvons réaliser notre plein potentiel en tant que région.

Because of this, we are in a better position to build a better region for all, with key strategic investments for people, families and communities throughout Restigouche.

Pour cela, et grâce à une discipline financière rigoureuse, nous sommes mieux placés pour bâtir un Restigouche fort pour tous et toutes et effectuer des investissements stratégiques clés dans l'intérêt de la population, des familles et des collectivités partout au Restigouche.

It is a privilege and a delight to work with such a fine team and I look forward to even further successes in the future.

C'est un privilège et un plaisir de travailler avec une équipe si remarquable et j'attend avec impatience ce que l'avenir nous apportera.

I invite you to continue to work with us as we overcome our challenges, as we embrace the future with pride, confidence and hope – a better Restigouche for all.

Je vous invite à poursuivre votre collaboration avec nous alors que nous surmontons les défis auxquels nous faisons face, que nous envisageons l'avenir avec fierté, confiance et espoir, et que nous créons des possibilités accrues - un Restigouche meilleur pour tous et toutes.

This annual report constitutes the reflection of our commitment supported towards the environmental protection and towards our contribution to a better management of the solid waste in Restigouche

Ce rapport annuel constitue le reflet de notre engagement soutenu à l'égard de la protection de l'environnement et de notre contributionà une meilleure gestion des déchets solides au Restigouche

S'il me fallait situer brièvement George Williams, j'emprunterais à Shakespeare – *Tout est bien qui finit bien* – un passage vraiment significatif, caractérisant bien l'ami et le collègue que nous honorons dans ce rapport annuel.

Sincerely Yours / Sincèrement,

Jean Perron

Jean Perron

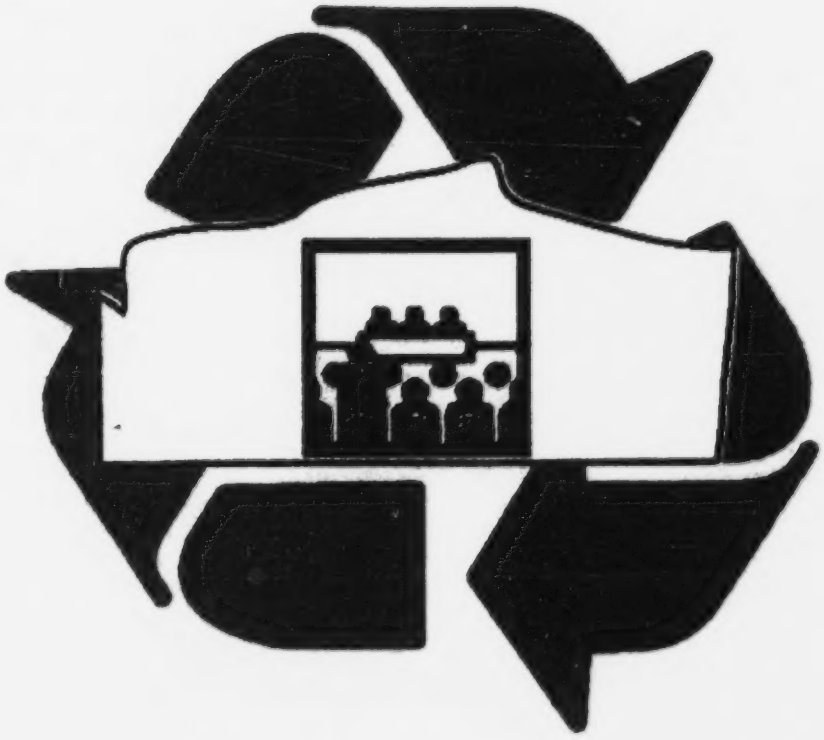
Executive Director's Message
du Directeur Général



Section 3
Executive Director's Message du Directeur Général

Acknowledgement

I would like to take this opportunity, to thank each and every one of you for your continued support and encouragement. It has been 16 years (part-time and full time) since I was entrusted with the administration of this great organization and what a great time it has been.

In 2005, our Corporation, like other solid waste commissions across this province, still had its challenges and battles, but one of the great tools we can all count on is partnership and mutual support.

As outlined in our mandate's statement, we are a Corporation driven by and for its members (LSD's, Municipalities and the ICI sector).

Only through the continued support of our members can we keep striving. The year 2005 has been challenging for some, although others have reported great success.

As strong and fragile as we think we are, one thing must remain in mind – we must support one another if we want to grow and prosper.

I would also like to pay tribute to George Jr. Williams. Mr. Williams believed firmly that we should reach out to and work with the community.

His broad experience was of invaluable benefit to the Corporation, and we continue to feel the loss of his wise counsel. Much more than a colleague, we miss our very dear friend.

Reconnaissance

J'aimerais profiter de cette occasion afin de remericer chacun d'entre vous pour votre appui et votre encouragement.

Seizes années (temps partiel – temps plein) remarquables sont passée depuis mon entrée au sein de ce merveilleux organisme.

J'aimerais profiter de cette occasion aussi afin de rendre homage à George Jr. Williams. M. Williams croyait fermement que la Corporation se devait d'ouvrir le dialogue avec la collectivité et collaborer avec les citoyens.

Sa vaste expérience a été d'un apport inestimable à la Corporation, et nous continuons à regretter la perte de ses conseils judicieux. Nous avons perdu plus d'un collègue – nous avons perdu un ami très cher.

A Success by any Measure

The successful delivery of programs and services and the attractiveness of any community can be measured several ways.

Perhaps the most obvious measurement is the commitment of our population. People want to live and work in our communities where water, air is clean?

Un succès par n'importe quelle Mesure

La livraison couronnée de succès de programmes et des services et l'attrait de nos communautés peut être mesurée de différentes façons.

La mesure la plus évidente est l'engagement de notre population. Nos citoyents veulent vivre et travailler dans des communautés où l'air est propre, l'eau est pure et nos communautés saines, et durables.

Putting People First

We continue to place a very high value on customer service as our programs and services increase in scope and complexity. From the creation of a full time position (Solid Waste Coordinator) to our annual report, and web site in 2005 - we will continue to emphasize the importance of customer service.

Only a short time ago, RSWC was a $60,000 Corporation. Now, due to the realignment of

responsibilities, we have grown into a $218,000 Corporation, operating services, such as recycling.

Our mandate is to operate these services in a fiscally responsible manner, with a clear vision of the future direction of service delivery. We will continue fulfilling this important mandate and maintain Restigouche region's position as:

> *"Under the leadership of our members, we are committed to the protection and to the improvement of the quality of our environment for the future generations".*

Les Gens en Premier

Nous continuons à placer une très haute valeur sur les services plus que nos programmes augmentent et deviennent complexes. De la création d'une position de Coordonnateur de la gestion des déchets solides à plein temps, à notre rapport annuel et à notre nouveau site Web en 2005 - nous continuerons à souligner l'importance d'un bon service à notre population.

Il y a peu de temps seulement que la CDSR était une Corporation de 60,000 $. Maintenant, en raison du réalignement de responsabilités, nous nous sommes développés en Corporation de 218,000 $ qui offre des services d'exploitation comme le recyclage.

Notre mandat doit faire fonctionner ces services d'une façon fiscalement responsable, avec une vision claire dont de livraison de service dans le futur. Nous continuerons à accomplir cet imporant mandat et maintiendrons la position de la Corporation pour la région du Restigouche:

> *"Sous le leadership de nos membres, nous sommes engagés à la protection et à l'amélioration de la qualité de notre environnement pour les générations futures".*

Thank you all for giving me the chance to work with this great organization, and hope we can continue serving you for many years to come.

Je vous remercie et j'espère continuer à travailler avec vous pour plusieurs années à venir.

Sincerely Yours / Sincèrement,

Ian Comeau

Profile / Profil

Section 4
Profile / Profil

Profile - Restigouche Solid Waste Corporation

Early in 1987, we realized that to manage our solid waste and to achieve diversion goals, we would have to approach waste management cooperatively. Studies commissioned in 1990 by the New Brunswick Department of the Environment showed that great savings could be made if Municipalities/LSD's planned and developed waste management on a regional basis.

The strategy supported this approach, and thus required that 12 Solid Waste Regions be established in the province. Each of the regions would submit Solid Waste Management plans to the Minister of the Environment describing the elements each region would use to manage its solid waste.

The Restigouche Solid Waste Corporation (RSWC) is an active group of 11 Municipal and LSD representatives representing the interest of 30,000 residents within the Restigouche region (Robinsonville to Nash Creek). The Corporation and its agents are accountable to a Board of Directors made up of local elected officials.

Currently, the Chairman is Jean Perron, representative for the Central LSD's. Serving as Vice-Chairman is Denis McIntyre, representative for the Village of Charlo, and serving as Secretary-Treasurer is Donald Pollock, representative for the Village of Tide Head. Their term expired in August 2005 when RSWC held its election, and they were all re-elected. In addition, the Corporation has eight other active Members representing the City of Campbellton (1), the Town of Dalhousie (1), the Villages of Atholville (1), Balmoral (1), Eel River Crossing (1), and the unincorporated areas or Local Service Districts (3). However, there are currently 3 vacant positions for the Local Service Districts(1 – August 2005 and 2 – August 2005).

RSWC works to ensure that the region's waste is handled properly. Municipal solid waste (msw) includes garbage and refuse generated at homes, offices and industries, leaf and yard wastes, and construction and demolition wastes.

The Corporation was created in 1992 in accordance with the Clean Environment Act (Regulation 96-11), which set regions waste reduction goals and authorized regions to form Commissions / Corporations that would work to achieve these goals.

Operating funds ($10.10 / tonne) are generated from the Transfer Station tipping fees ($2 / tonne royalty for 10 consecutive years; $5.13 / tonne in 2005 and a recycling fee of $4.97 / tonne which was introduced in 2003), and grants. Most of the grant money would come from the Provincial Department of the Environment and Local Government (DELG).

RSWC addresses issues that affect solid waste management within the Restigouche region (Re: education, recycling, waste collection, illegal dumping, illegal reclamation sites, etc.).

Board meetings are held monthly (see the 2005 schedule of meetings) and current topics of concern are discussed. RSWC encourages participation in its activities, etc.

Profil – Corporation des Déchets Solides du Restigouche

La Corporation des Déchets Solides du Restigouche (CDSR) est un groupe actif de 11 Représentants des Municipalités et DSL's ayant comme mandat de représenter l'intérêt de 30,000 résidents de la région du Restigouche (Robinsonville à Nash Creek) dans le dossier est la gestion des déchets solides.

Actuellement, le Président de la Corporation est Jean Perron, un des 4 représentants pour les Districts des Services Locaux (DSL's). Le Vice-Président est Denis McIntyre, représentant pour le Village de Charlo, et le Secrétaire-Trésorier est Donald Pollock, représentant du Village de Tide Head. Le mandat de cet Exécutif s'est terminé en août 2005, et ils furent tous ré-élus lors de l'élection en septembre 2005. Il y a aussi 8 autres Membres qui siègent au sein de la Corporation. Ces Membres représentent: la Cité de Campbellton (1), la Ville de Dalhousie (1), les Villages d'Atholville (1), Balmoral (1), Eel River Crossing (1), et les Districts des Services Locaux (3). Il y a cependant 3 postes vacants pour les Districts des Services Locaux (1 – août 2004, et 2 – août 2005).

La Corporation se rencontrent mensuellement (voir la cédule 2005 des réunions) pour discuter de sujets ayant intérêt avec la gestion des Déchets Solides pour la région du Restigouche. Les déchets solides urbains comprennent généralement les déchets résidentiels, industriels légers, commerciaux et institutionels dont la cueillette est assuré par les Municipalités/DSL's et/ou par des Entrepreneurs.

La Corporation reconnaît l'importance de protéger et améliorer l'environnement, et s'engage à fournir un leadership aux communautés qu'elle déssert dans le domaine de la gestion des déchets. La Corporation apprécie les besoins et responsabilités des gouvernements locaux et s'engage à consulter les citoyens et les secteurs industriels, institutionels et commerciaux de la région afin de gérer les déchets qu'ils produisent de façon responsable envers l'environnement, acceptable pour la société et économiquement réalisable.

La Corporation opère un budget dont la majorité des fonds (10.10$ / tonne) parviennent du montants / tonne (2 $ / tonne pour 10 ans consécutifs; un frais administratif de 5.13$ / tonne et un frais de 4.97$ / tonne pour le recyclage en 2005). Des subventions gouvernmentales, principalement du Ministère de l'Environnement et des Gouvernments Locaux, sont aussi disponible aux Commissions des Déchets Solides du Nouveau Brunswick. La Corporation encourage la participation des gens à ses activités, etc.

Nos forces et notre dynamisme font que la Corporation est prête à jouer un rôle prépondérant dans les actions à mener en vue de l'atteinte des objectifs gouvernementaux. L'année 2004 nous aura donc permis de consolider notre action aux quatre coins du Restigouche et de développer une concertation essentielle avec l'ensemble des acteurs dans le domaine des déchets solides. Nous avons donc préparé l'avenir. Nous connaissons les besoins des résidents du Restigouche, nous avons analysé, étudié puis proposé des modes de gestion et un plan d'action.

Se Préoccuper de l'Environnment sans poser de gestes concrets n'est pas suffisant! Nous devons faire des choix qui puissent avoir un réel impact sur nos resources naturelles! L'Environnement - Nous devons faire quelque chose pour nous assurer que nos actions ne menaçent pas notre avenir!

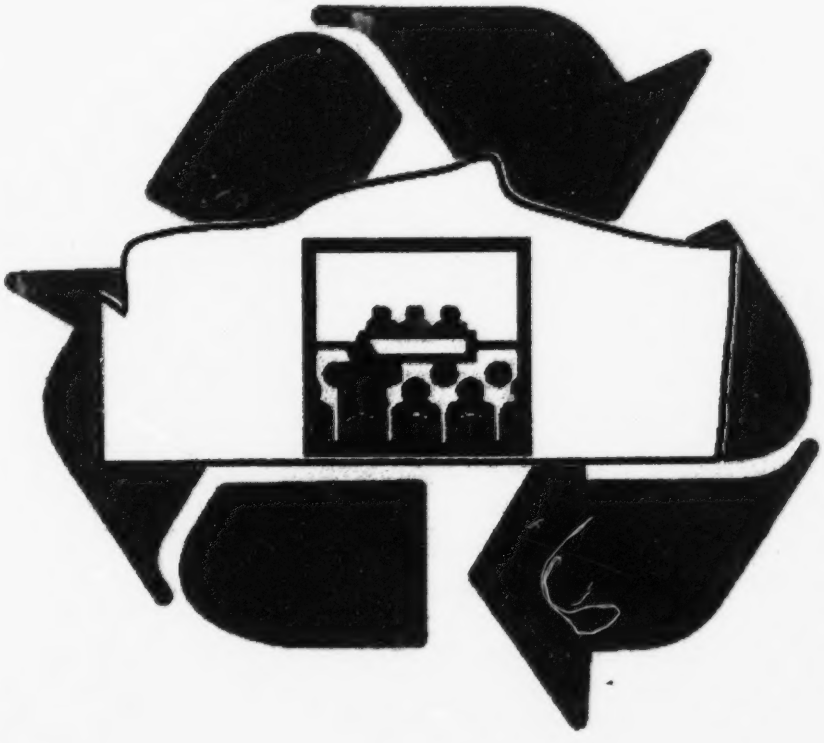
Members / Membres



Section 5
Members / Membres

The tables below show the appointments of each Member, as well as their term. The first appointment (August 1st, 1995) was done by the Minister of the Environment, while all the others were and will be done by each Municipality (7), and by the Minister of the Environment and Local Government, upon consultation with the Municipal Service Representative who has met elected representatives from the LSD's.

Le tableau ci-dessous explique les nominations des Membres, ainsi que les termes dont ils ont été appointé pour. La première nomination (août 1995) a été effectué par la Ministre de l'Environnement.

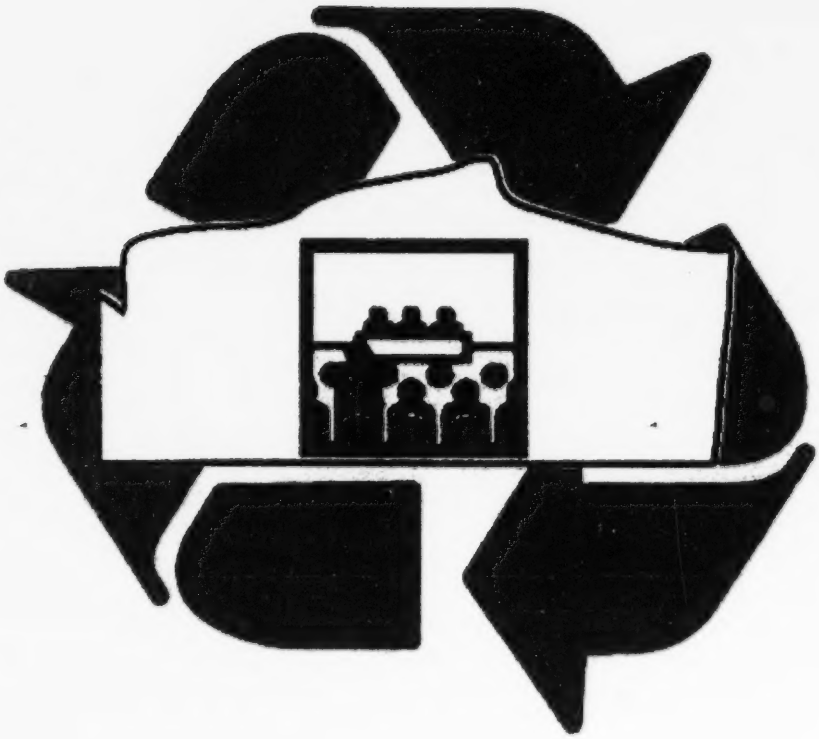
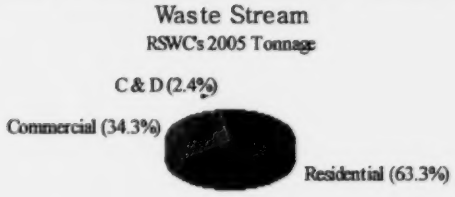
Rapport sur le Tonnage Report



Section 6
Rapport sur le Tonnage Report

Tonnage Generation - Municipalities / LSD's, ICI
A Breakdown / A Comparison

Waste Sream	Tonnage
Residential	9,817.46
Commercial	5,328.30
C & D	372.02
Recycling	224.64
TOTAL	15,742.42



According to the 2005 Waste Audit, roughly 63.3% (9,818 tonnes) of our solid waste is generated by the households, and 36.7% (5,700 tonnes) comes from businesses, institutions, and industries. These numbers could, and would be much higher if it wasn't for the C & D sites, and reclamation sites within our region. Where are the tonnage numbers for these sites? It would be nice to see the tonnage generated at these sites, and would it be considered a diversion from sanitary landfills / transfer stations?

Selon les chiffres pour l'an 2005, 63.3% (9,818 tonnes) de nos déchets sont produits par le secteur résidentiel, et 36.7% (5,700 tonnes) proviennent du secteur commercial (ICI). Ces chiffres seraient plus élevés si nous aurions aucun site de réclamation (débris de construction) dans la région du Restigouche. Ces sites ont-ils enrégistrés le tonnage pour l'an 2005, et peut-on inclure ceci à nos chiffres comme étant une réduction, ou comme étant un réacheminement de déchets?

TABLE / TABLEAU - 2004

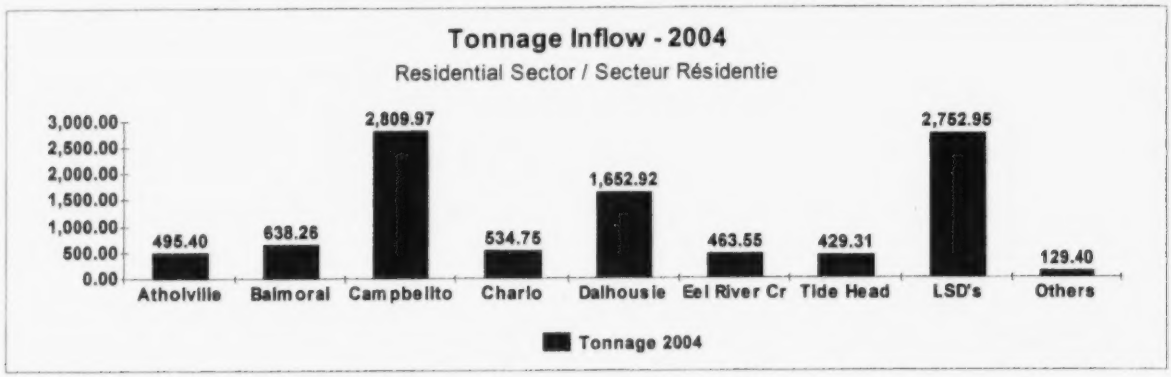

TABLE / TABLEAU - 2005

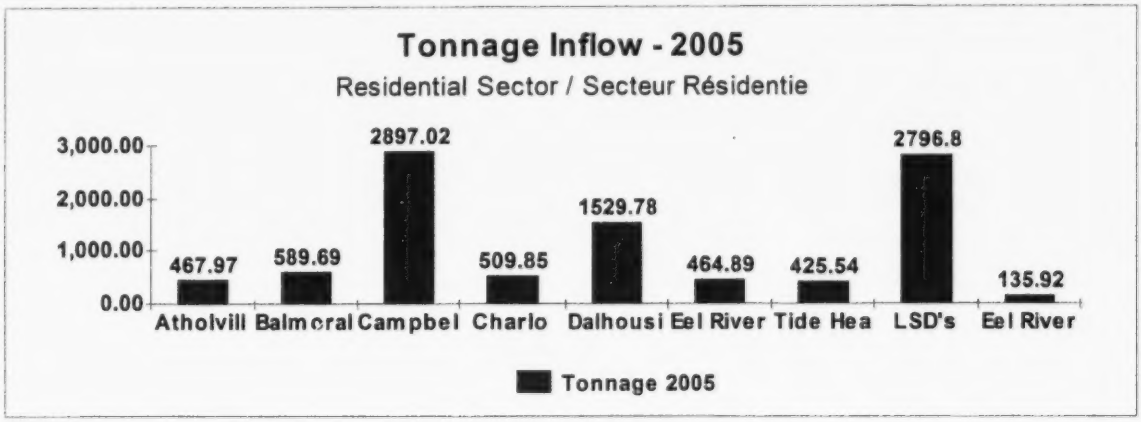
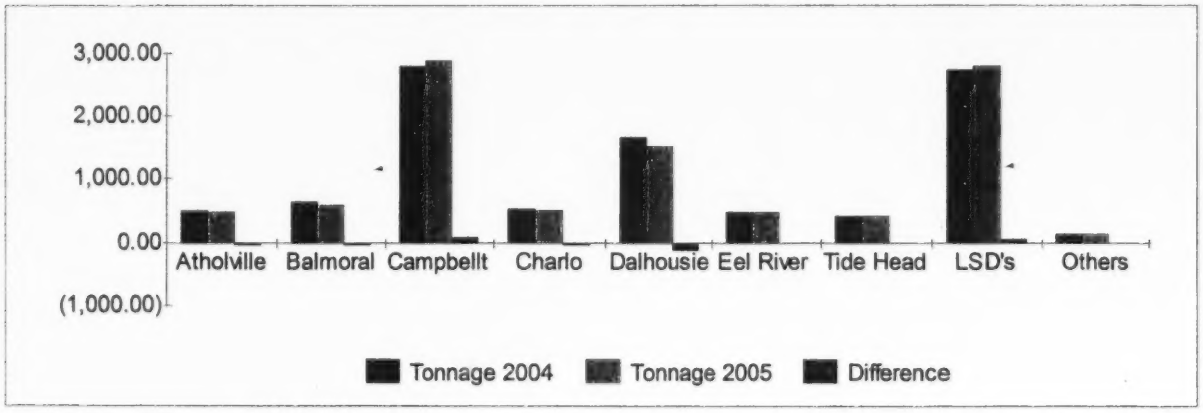


COMPARAISON
2004 vs 2005



The 2005 figures determined that 38.6% of the Restigouche's Municipal Solid Waste was produced in the Atholville / Campbellton / Tide Head area. That percentage changes somewhat with the 5,700 ICI tonnes (36.7%), but the Campbellton area is still the region's major waste generator. There was a decrease of 89.05 tonnes at the Residential level, and a decrease of 30.43 tonnes at the ICI level. We saw an overall decrease of 119.48 tonnes if you compare these stats with the 2004 numbers. If

you add the 224.64 tonnes of recyclables to the residential decrease of 119.48 tonnes - it would bring the decrease totals to 344.12 tonnes (3.50%). At the residential level, Campbellton had the biggest increase (87.05 tonnes – an increase of 3.1%) while Dalhousie registered the biggest decrease (123.14 tonnes – an decrease of 7.5%).

Selon les chiffres pour l'an 2005, 38.6% des déchets proviennent de la région d'Atholville / Campbellton / Tide Head. Le pourcentage change si nous incluons une part des 5,700 tonnes (36.7%) du secteur commercial (ICI). Lorsque l'on compare les statistiques de l'an 2005 avec 2004; on remarque une dimunition de 89.05 tonnes au secteur residential et une diminution 30.43 tonnes au secteur commercial (ICI). Nous avons donc vu une diminution de 119.48 tonnes si l'on compare le tonnage de 2005 à celui de 2004. Si l'on ajoute les 224.64 tonnes de recyclables à la diminution résidentielle de 89.05 tonnes - le total de diminution est 344.12 tonnes (3.50 %). Au niveau résidentieal, Campbellton avait la plus grande augmentation (87.05 tonnes - une augmentation de 3.1 %) tandis que Dalhousie a enregistré la plus grande diminution (123.14 tonnes – une diminution de 7.5 %).

On average, each resident generated 0.34 tonnes (754.48 lbs) in 2005, a decrease of 6.84 lbs / resident compare to 2004; and each household generated an average of 0.91 tonnes (2,002.08 lbs) in 2005, a decrease of 18.16 lbs / household compare to 2004. On a per month basis, we generated 0.01 tonnes (62.87 lbs)/resident, compared to 0.08 tonnes (166.8 lbs)/household. On a per week basis, we generated 0.01 tonnes (14.5 lbs)/resident, compared to 0.02 tonnes (38.5 lbs)/household. Please take note that these numbers only reflect the municipal solid waste of 9,817.46 tonnes. Roughly 37% of our waste is paper products, such as newsprint, fine paper, and corrugated cardboard.

En moyenne, chaque résidant ont produit 0.34 tonnes (754.48 livres) en 2005, une diminution de 6.84 livres / résidant si l'on compare les statistiques de 2004; et chaque ménage (maison) ont produit une moyenne de 0.91 tonnes (2,002.08 livres) en 2005, une diminution de 18.16 lbs / ménage si l'on compare les statistiques de 2004. Sur une base mensuelle, nous avons produit 0.01 tonnes (62.87 livres) / résidant, comparé à 0.08 tonnes (166.8 livres) / ménage. Sur une base hebdomadaire (par semaine), nous avons produit 0.01 tonnes (14.5 livres) / résidant, comparé à 0.02 tonnes (38.5 livres) / ménage. Il est important de noter que ces numéros reflètent seulement les déchets municipales / résidentiels de 9,817.46 tonnes. En moyenne, 37 % de nos déchets sont des produits de papier, comme le papier journal, le papier de bureau et le carton ondulé.

COMPARAISON

2004 vs 2005

Waste Sream	Tonnage 2004	Tonnage 2005	Difference
Atholville	495.40	467.97	-27.43
Balmoral	538.26	589.69	-48.57
Campbellton	2,809.97	2897.02	87.05
Charlo	534.75	509.85	-24.9
Dalhousie	1,652.92	1529.78	-123.14
Eel River Crossing	463.55	464.89	1.34
Tide Head	429.31	425.54	3.77
LSD's	2,752.95	2796.8	43.85
Others	129.40	135.92	6.52
TOTAL	9,906.51	9,817.46	(81.51)

The region saw a decrease of 119.48 tonnes in 2005 and an additional 224.64 tonne decrease of fibres (newspaper, paper, cardboard), metals and plastics and this decrease (344 tonnes or 6.61 tonnes/week) is basically the work of the Residential sector. The ICI sector saw 30.43 less tonnes (0.58 tonnes/week). If you compare these numbers to the 2003 drastic increase of 449.64 tonnes (8.64 tonnes/week) at the residential sector – we are on the right track. In 2005, the biggest increase at the residential sector was Campbellton once again with 87.05 tonnes (1.67 tonnes/week), and in 2005, the biggest decrease at the residential sector was Dalhousie with 123.14 less tonnes (2.37 tonnes/week).

La région a vu une diminution de 119.48 tonnes en 2005, et une diminution additionnelle de plus de 224.64 tonnes de fibres (papier journal, le papier de bureau, le carton), de métaux et de plastiques; et cette diminution est essentiellement le travail du secteur Résidentiel. Le secteur ICI a vu une diminution de 30.43 tonnes (0.58 tonnes/semaine). Si l'on compare l'augmentation de 2003 de 449.64 tonnes (8.64 tonnes / semaine) au secteur résidentiel – on est sur le bon chemin. En 2005, la plus grande augmentation au secteur résidentiel fut encore une fois de plus celle de Campbellton avec 87.05 tonnes (1.67 tonnes / semaine), alors qu'en 2005 Dalhousie a enrégistré la plus haute diminution avec 123.14 tonnes (2.37 tonnes/semaine).

Dear Sirs:

Re: 2005 Financial Statements

In connection with your audit of our financial statements we make the following representations:

To the best of our knowledge and belief:

1. Asset, liability, equity, revenue and expenditure accounts as adjusted during your review, together with supplemental information brought to your attention, provide the necessary information to prepare the financial statements which will properly reflect the financial position and results of operations on a consistent basis.

2. We have not omitted or mis-stated any material fact which might have a bearing on the financial statements.

3. Transactions conducted with outside parties during the year were at arms' length and none of the officers or directors had material interest not made known to us in other businesses with which we had significant transactions.

4. No matters have occurred subsequent to the year end which are of a nature or amount which render the financial statements inaccurate or misleading, or which require disclosure.

5. You have had access to minutes of all meetings of the Board since previous fiscal year end and no important action has been taken which is not reflected in the minutes.

.../2

6. All claims and possible claims have been made known to you and any material items are appropriately disclosed in the financial statements. We further confirm that we are not aware of any illegal or possibly illegal acts that have not been brought to your attention.

7. We acknowledge our responsibility for the implementation and operation of internal controls that are designed to prevent and detect fraud and error.

8. We have disclosed to you all significant facts relating to any frauds or suspected frauds known to management that may have affected the financial statements.

9. We have disclosed to you the results of our assessment of the risk that the financial statements may be materially misstated as a result of fraud. It is our opinion that the financial statements are not materially misstated as a result of fraud or for any other reason.

10. We have reviewed and approved all of the following:

    a. Journal entries you prepared or changed.
    b. Account codes you determined or changed.
    c. Transactions you classified.
    d. Accounting records you prepared or changed.

Yours very truly,

AUDITORS' REPORT

To The Directors of
Restigouche Solid Waste Corporation

We have audited the operating fund and reserve funds balance sheets of Restigouche Solid Waste Corporation as at December 31, 2005 and the operating fund statement of revenue and expenditures for the year then ended. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether these financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Corporation as at December 31, 2005 and the results of its operations for the year then ended in accordance with Canadian generally accepted accounting principles.

RESTIGOUCHE SOLID WASTE CORPORATION

Notes To The Financial Statements

For The Year Ended December 31, 2005

1. Status and Nature of Activities

The Restigouche Solid Waste Corporation was incorporated under the Province of New Brunswick Clean Environment Act (O.C. 96-173) by Order-in-Council 95-749, dated July 20, 1995 as a not-for-profit organization. It has been established to administrate a transfer station for Restigouche County. All refuse collected is hauled to Red Pine landfill site in Allardville, NB.

2. Significant Accounting Policies

These financial statements have been prepared to conform in all material respects to the accounting principles prescribed for New Brunswick municipal entities by the Department of Environment and Local Government.

a. Revenue Recognition

Major sources of revenue are recorded on an accrual basis.

b. Expenditure Recognition

Expenditures are recorded on an accrual basis. Outstanding commitments for goods and services relating to the current year are accrued at the balance sheet date.

c. Capital Assets

Capital assets are recorded at cost. They do not record depreciation on their equipment. Funds received through capital assistance programs and cost sharing arrangements are treated as additions to investment in capital assets.

d. Accounting Estimates

The preparation of financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts recorded in the financial statements and notes to financial statements. These estimates are based on management's best knowledge of current events and actions that the company may undertake in the future. Actual results may differ from those estimates.

3. Facility Ownership

The transfer station facility is owned by Maritime Disposal Inc. and will be conveyed to Restigouche Solid Waste Corporation for $1 December 31, 2009.

RESTIGOUCHE SOLID WASTE CORPORATION

Notes To The Financial Statements

For The Year Ended December 31, 2005

4. Contributed Surplus

The Department of Environment and Local Government's Environmental Trust Fund transferred recycling containers to Restigouche Solid Waste Corporation.

5. Surplus

The Municipalities Act requires surplus amounts of municipal entities to be absorbed into the operating budget the second following year. Accordingly, the 2004 surplus of $7,282 must be budgeted in the 2006 fiscal year and the 2005 surplus of $6,013 must be budgeted in the 2007 fiscal year by the Corporation.

6. Statement of Cash Flow

A statement of cash flow was not presented as the directors of the Corporation believe that it would not add any additional information for readers of the financial statements.

7. Financial Instruments

Fair Values

The carrying amount of current assets and current liabilities approximates their fair value due to the short term maturities of these items.

10

Conclusion

Section 10
Conclusion

While Restigouche is an extremely diverse region, with different cultures, languages, lifestyles and ideas, there is one thing that we all have in common; garbage. We all produce it; it is something that we cannot avoid.

Waste management is rarely thought of outside of our routine: put it in a garbage bag and put it at the curb on collection day.

Have you ever thought about what happens to your waste after that point?

Do you know how waste is managed in our area?

The Restigouche Solid Waste Corporation is the organization responsible for waste management in northern New Brunswick.

For many of us, the recycling program has become routine in our daily lives. It is a simple way to recycle at home.

The program was designed to be as simple and cost effective as possible.

Because Restigouche is able to recover so many items, we are helping to save valuable landfill space. When the Népisiguit-Chaleur landfill started in 1992, it was estimated that it would last 30 years. With current diversion rates, it is estimated that the landfill will last more than 50 years. As the level of participation approaches 10 per cent, that number will continue to increase.

Not only does this help us to improve our environment, but it also helps the Corporation to maintain the tipping fee at a reasonable rate. To build one landfill cell at Red Pine costs the Népisiguit-Chaleur Commission $1.2 million. In 1992, one cell, a contained area where waste is stored, lasted three years. The latest landfill cell can last a full 5 - 6 years, saving the Commission $2.4 million, if every four region recycles their paper, cardboard, metals and plastics.

When waste is disposed of at the transfer station, a tipping fee is charged. Since the region's tipping fee is one of the lowest in New Brunswick, municipalities are paying the lowest rate for waste management.

Many of the recovered recyclables can be sold to recyclable markets, which also contribute to lower tipping fees. Lower waste management costs equal a smaller part of our tax money being used for this portion of the municipal budget. Choosing to participate is choosing to improve our environment, and choosing to better allocate our tax dollars.

We can take pride in the fact that we have so many people who are willing to make a small change in their daily lives, for the benefit of everyone in our area.

Tandis que Restigouche est une région extrêmement diverse, avec des cultures, des langues, des styles de vie et des idées différentes, il y a une chose que nous tous ont en commun; les déchets. Nous en produisons tous; c'est quelque chose que nous ne pouvons pas éviter.

La gestion des déchêts est rarement pensée à l'extérieur de notre routine: mettez-le dans un sac de déchets et mettez-le au bord du chemin pour le jour de collecte.

Avez-vous jamais pensé qu'est-ce qui arrive à vos déchets après ce point ?

Savez-vous comment les déchets sont gérés dans notre région?

La Corporation des Déchets Solides du Restigouche est l'organisation responsable de la gestion des déchêts dans le nord du Nouveau Brunswick.

Pour beaucoup d'entre nous, le programme de recyclage est devenu ordinaire dans nos vies quotidiennes. C'est une façon simple de réutiliser à la maison.

Le programme a été conçu pour être aussi simple et avantageux financièrement que possible.

Parce que le Restigouche est capable de récupérer tant d'articles, nous aidons à sauver l'espace d'enfouissement des déchets. Quand l'enfouissement des déchets a commencé en 1992 à Népisiguit-Chaleur, il a été évalué que cela durerait 30 ans. Avec des taux de déviation actuels, il est évalué que l'enfouissement des déchets durera plus de 50 ans. Comme le niveau de participation s'approche à 10 pour cent, ce nombre continuera à augmenter.

Le recyclage nous aide non seulement à améliorer notre environnement, mais il aide aussi la Corporation à maintenir les frais de dispositions à un taux raisonnable. Construire une cellule d'enfouissement des déchets à Red Pine coûte la Commission de Népisiguit-Chaleur 1.2 $ millions. En 1992, une cellule, un secteur contenu où les déchêts sont enfouis, avait une durée trois ans. Une cellule d'enfouissement des déchets peut a maintenant une durée de 5 - 6 ans, économisant la Commission plus de 2.4 $ millions, si les quatre régions recyclent/réutilisent le papier, le carton, les métaux et les plastiques.

Quand les déchêts sont transportés à la station de transfert, des frais sont chargés. Puisque leş frais de la région sont un des plus bas au Nouveau Brunswick, les Municipalités/DSL's payent le taux le plus bas pour la gestion des déchets.

Beaucoup de recyclables récupérés sont vendus aux marchés, qui contribuent aussi pour baisser les frais. Des dépenses de gestion des déchêts inférieures égalent une partie plus petite de notre argent fiscal étant utilisé pour cette partie du budget municipal. Le choix de participer améliore notre environnement et nous permet mieux à répartir nos dollars fiscaux.

Nous pouvons être fière du fait que nous avons tant de personnes qui désirent faire un petit changement dans leurs vies quotidiennes, pour l'avantage de chacun dans notre région.
